End of Day

Print a driver record for packages shipped.

UPS requires its customers using computer based shipping systems to perform "End-of-Day" at least once each day a package is shipped. This will produce a driver record and send an electronic record of your packages to UPS, ensuring proper billing. This is only required, however, if you are using your own UPS account. You should perform End and print your driver record before the driver arrives.

You have shipped XX packages since your last driver pickup.

To print a driver record, press Perform End.

Occasionally you might need to reprint a driver record if the original was lost, damaged or was otherwise unreadable by the driver. To reprint a driver record from a previous date click Find Driver Record below. You will be shown a list of previous records in the order they were created, the most recent at the top of the list.
